Bron beeld: Floriade B.V.

Nature-increasing urbanism | Working on a sustainable city

City campus Deventer | Contributing to spatial quality

Dike reinforcement Koelhol Lauwersmeer | Working on water safety

Dubai | Working in an international context

Working integrally with other disciplines

Witteveen+Bos is an ambitious consultancy firm that designs at the interface of water, infrastructure, space, environment and construction. About 30 landscape architects, urbanists and architects are active within the company nationally and also internationally. Our designers work in interdisciplinary teams on integrated plan development at various scale levels, ranging from small to large assignments and from visions to detailed elaboration.

Selection of projects (but there is more)

- Schiedam; various urban tasks from municipal visions, redevelopment of neighborhoods into green city entrances;
- city campus Deventer; spatial quality, city branding and digitization;
- neighborhood renewal Selwerd; upgrading public space in a post-war district;
- various public spaces of spatial developments, Dubai;
- (graduation) research into nature-increasing urban design.

We work from the Netherlands with the option of participating in some of your projects in foreign assignments!

What we are looking for

- a driven and enthusiastic HBO or WO student;
- with a broad interest and social attitude;
- interest and affinity with social media is a plus;
- with good skills with Adobe Indesign, Photoshop and Illustrator. Autocad is a benefit but not a requirement.

What we offer

- working location Utrecht or Deventer (1-2 days in Rotterdam is negotiable);
- integrated work environment with contact with many other disciplines;
- guidance from experienced designers;
- internship allowance of EUR 450 (for a 40-hour working week);
- part of a fun team with social activities.
